

Campus-Wide Wireless Access is available to staff at BUMC. The ability to use your mobile devices throughout our facility with ease and without drop in connectivity. You will see 2 active wireless networks (SSID's);

## **BUMC-Staff   BUMC-Public**

**All staff** will need to use BUMC-Staff network. This is a password protected network that uses your BUMCDOMAIN username and password. This is the same password you use to login to your computer. If you're unsure of this password, I'm happy to change/renew it for you. **BUMC-Public** is not password protected and easier to use, but has limited network access and will not connect to BUMCDOMAIN resources. If you use this PUBLIC network, you will encounter blocked websites, not printing resources, etc.
